SUBJECT: VERIFICATION/COMPLETENESS CHECK – DIMOCK, PA LABORATORY DATA
PACE-Validated Report-R33917 5058051.PDF

INTRODUCTION

On March 13, 2012, a review of the case narratives and corresponding certificates of analysis from Pace Laboratory (Ethylene glycol Reports Posted March 8) was reviewed at the SERAS facility in accordance with the Follow-Up Verification/Completeness Check agreed upon during our teleconference on Wednesday 2/8/12.

The assumptions for this review include the following: 1) Case narratives from the Regional labs and/or subcontract labs have been reviewed in accordance with Regional or Environmental Services Assessment Team (ESAT) protocols and contain all pertinent and complete information to conduct the completeness check. SERAS will base this review on the information provided by the laboratory and not on an actual data package; and 2) SERAS will relay any “red” flags to the EPA R3 personnel to resolve and determine data usability.

OBSERVATIONS

In accordance with Table 1 – Field and QC Sampling Summary (Rev01 - 2/3/12), Table 2 – Sample Analytical Requirements Summary (Rev01 – 2/3/12), Methods for Groundwater and Surface Water Samples and SW-846 8015B, the following observations were noted and need to be clarified/resolved.

PACE-Validated Report-R33917 5058051.PDF

1. Analysis log sheets were not provided. It is assumed that the date of analysis on the analytical result sheets is correct and is within the holding time criteria for the analysis. The holding times were checked from the time of collection on the chain of custody (COC) to the time of analysis on the analysis log sheet. Holding time review was based on a 14 day period. No additional qualifications are required.
2. Raw data was not provided, it is assumed that the sample results are all none detected and the stated concentrations in the LCS and MS/MSD tables are correct and pass their QC criteria. No additional qualifications are required.
